

***MAD.***

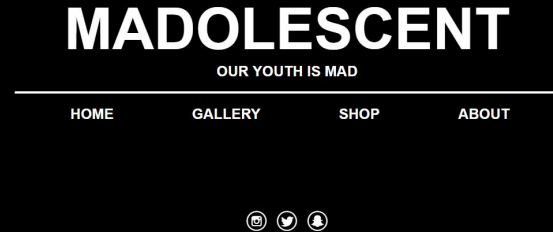

***THE MADOLESCENT WEBSITE***

# Our Intentions

- We intended to create a better version of the website of our brand than we already had.
- Our original website had very basic features with none of the design that a professional website should have
- It was a basic shop that we wanted to make into a real brand experience.

No products found.

# Why Our Website Is Different

- Our website is similar to most other retail websites
- Because of this we tried to make the layout as unique as possible while still keeping it clean and simple.
- Our site features full bios of the employees accompanied by a 3D carousel with pictures of them.

## ABOUT

[HOME](#)[GALLERY](#)[SHOP](#)[ABOUT](#)

### DEADISAAC

Yet for all that these stories maintain a distance between their world and that of their time of literary growth and composition, they reflect the political realities of the later periods. Many of the narratives deal with the relationship between the ancestors and peoples who were part of Israel's political world at the time the stories began to be written down (eighth century B.C.E.). Lot is the ancestor of the Transjordanian peoples of Ammon and Moab, and Ishmael personifies the nomadic peoples known to have inhabited north Arabia, although located in the Old Testament in the Negev. Esau personifies Edom (36:1), and Laban represents the Aramean states to Israel's north. A persistent theme is that of difference between the ancestors and the indigenous Canaanites... In fact, the theme of the differences between

### GOOD WILLI\$

I played for the 2nd team as a freshman and I became captain of that team as a sophomore. I also play for C2 Elite u19 flight 1 team with Cherif Zein. I went to semifinals of CIF with Pasadena High School in the 2014-2015 season after being moved up to varsity at the end of my JV season my sophomore year. This year we just completed our season for the Pasadena High School Varsity team where sadly we lost in the semi-final of CIF in penalty kicks. However we were accepted to play in the state finals and are training for that now. I recently attended the Copa Chivas Tournament in Guadalajara with coach Jose Garcia of Cal Poly Pomona. It was a great experience to be able to play in a foreign country and we ended up losing in penalties in Quarterfinals to the team that went on to win the tournament.

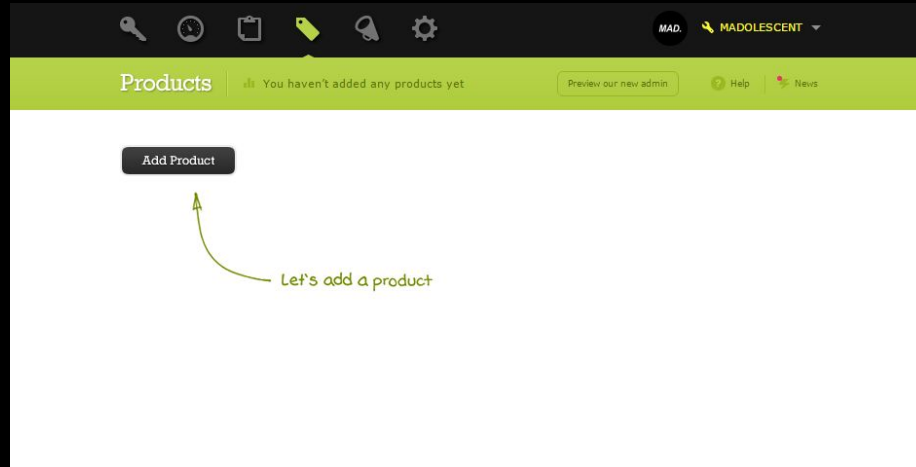

# How The Project Was Made

- The Project was made with HTML, CSS, and JavaScript
- Most of the project was made with what we learned about websites in the 10th grade
- When we wanted to add something that we didn't remember or didn't know how to do we would google what we were looking for and try to replicate whatever we found.

# Our Challenges

- The biggest challenge was the beginning of the project.
- The first few bumps and working out the small details took the most time.
- Once the basic layout was done the rest came pretty easily.
- Sign In/ Cart was also difficult but we were able to find a way around it by using the big cartel back end

# The Final Product
